Central Region Homeland Security Advisory Council

Equipment Resource Guide

Central Region Homeland Security Advisory Council
Equipment Resource Guide

The Central Region is one of five homeland security districts in Massachusetts. The Executive Office of Public Safety and Security (EOPSS), designated by the Governor as the state's Homeland Security Advisor, adopted a statewide regional approach to security and emergency coordination. The Regional Security Strategic Plan for the Commonwealth lays out a strategy for linking regional public safety officials to detect, prevent, respond to and recover from the consequences of an emergency, terrorist threat or critical incident.

The objective of the Homeland Security Central Region Advisory Council is to provide a regional framework for collaboration in planning, communication, information sharing, procuring equipment, and training and exercise activities before, during and after an emergency for the sixty units of local government in the Central Region. The five (5) specific goals for this effort include:

1. Enhance the ability to assess risk and prevent future terrorist attacks or critical incidents.

2. Improve the ability to collect, analyze, disseminate, and manage key information.

3. Improve preparedness by enhancing regional coordination.

4. Improve the ability of first responders to communicate at the scene of a terrorist attack or other critical incident.

5. Improve the ability to recover from a terrorist attack or other critical incident.

The Regional Advisory Council includes representatives from these areas: Law Enforcement, Fire Services, Public Safety Communications, Emergency Management, Emergency Medical Services, Public Health, Hospitals, Public Works, Regional Transit Authority, Correctional Services, Local Government Administration, Executive Office of Public Safety and Security (EOPSS), and Massachusetts Emergency Management Agency (MEMA).

PURPOSE OF THE EQUIPMENT RESOURCE GUIDE

Faced with shrinking municipal budgets, many communities in Worcester County are having difficulty finding the funding to purchase equipment they need to respond to large scale emergencies. To address this shortfall and ensure that region has the equipment it needs, the Central Region Homeland Security Advisory Council has purchased various pieces of emergency response equipment and has strategically positioned it across Worcester County. When a community, an agency, or a region needs specialized equipment or additional resources to help it cope with an emergency, it can draw these resources from Homeland Security Council's equipment pools. When they are done with the equipment, it is returned, serviced and ready to be used for the next emergency. This strategic staging of resources not only provides specialized equipment that a community might not be able to purchase on its own, but prepares the entire region for response to large scale emergencies.

The document contains the best information available at publication, personnel and organization changes are inevitable, also, equipment may be relocated at the discretion of the CRHSAC. Please contact Adam Menard at (508)459-3344 or amenard@cmrpc.org with updates and/or corrections to the information contained in this document.
